Jon,

Thanks for the email and your message. We appreciate Stratus's response, and are fine with the approach you outline below. Please feel free to contact me with any questions.

Thanks,

ap

Subject: Administrative Settlement Agreement and Order on Consent for Removal Actions CERCLA Docket No.CERCLA-08-2018-0002

Amelia: Pursuant to my phone message, this note will confirm that Stratus Redtail Ranch, LLC intends to complete the work generally outlined in Joyce's email dated April 3, 2018. In order to formally confirm the work to be performed, Geosyntec is in the process of preparing a memo that specifies all work remaining to be done at the site. A comprehensive graphic will accompany this memo to assure there are no misunderstandings. We anticipate that this memo will be submitted to the OSC no later than this Friday April 13 mid-day. We need the time between now and then to finalize a graphic and confirm certain items with ACT. ACT has previously advised that it believes that this work can be completed in 4 to 6 weeks. Therefore, Stratus will endeavor to complete the work described in the memo by the end of May 2018, barring delays due to weather, laboratory turn around, landfill approvals, and the like. Upon review and approval of the memo by EPA, we would like written confirmation from the OSC that based on the information to date and assuming that all work is done in accordance with the approved memo, the approved Drum Removal Work Plan and the AOC, the outlined work is all of the remaining work that needs to be done to close out Stratus' removal obligations under the AOC. Obviously, ultimate close out of the AOC will require timely submittal and approval of a Summary Report. For your information, Stratus has approved and is conducting the offsite disposal of the remaining roll offs (other than those that the OSC approved to remain onsite). All attendant paper work will be forwarded as required under the AOC. Please let me know if you have any further questions regarding this issue. Thanks Jon
